

[Filepane 1.10.2 For MacOS](#)

Edit EXIF, IPTC, XMP, ICC, PDF and maker tags
The app supports more than 5000 tags and more than 90 file formats

The screenshot shows the Filepane application interface. On the left is a sidebar with a list of images, including 'andscape68329.jpg', 'demoimage.jpg', 'A3pQuVEy5...vIF8cuvA.JPG', 'IMG_7687.CR2', and 'L1018043 copy 2.DNG'. The main area is divided into three panels: 'Metadata:', 'Preview:', and 'Location:'. The 'Metadata:' panel is active and shows fields for 'General' (Artist: Jérémy, Image Description: Multiple Values, Copyright, Software: Metalimage for MacOS, User Comment: My new trip in the USA), 'Camera' (Make, Camera Model Name, Serial Number), 'Date' (Date/Time Original, Create Date, Modify Date), and 'Camera Settings' (ISO). The 'Preview:' panel shows a thumbnail of a landscape image and a map of Switzerland with the text 'No Embedded Location'. The 'Location:' panel shows a map of Switzerland with a scale bar from 0 to 750 km.
